It's been a while since I was here last and I have improved both my intermediate and expert highscores. I now have 2x18 and several 19's and on the expert 53, 55, 57 and some 59's. I can see that I still need to practise my intermediate-skills.

Minesweeper. One of those most painful of pleasures. Lecturers don't take it as an excuse for late essays, I've found. Do remind me to delete it in the near future.

great page! i am an expert for the intermediediate i think, for i can consistently play under 30 with a good mouse. my average is about 30. can play a 26 or better within 20 times. if given 2 hours, can definitely play a 25 or better. if given half day, quite poss bly get a 23 or better. of course, with a very good mouse. but my expert is not very good, only one 76 and two 79, though a lot of 80s.
